

Pennington Biomedical KG Explorer

Quick Reference Card

Open in your browser:
<http://pubmap.pbrc.edu>
No login required

THREE PAGES

Dashboard

Auto-loads on open. Shows publication trends, top diseases, top authors. No interaction needed.

Query Explorer

20 pre-built questions. Pick category → pick query → set parameters → Run Query. Download results as CSV.

Ask a Question

Type any research question in plain English. AI translates it and summarizes the results. Needs internet.

COMMON WORKFLOWS

Grant writing

Queries 1, 4, 9, 15 → export CSV

Find a collaborator

Queries 8, 9 or Ask a Question

Literature search

Query 12 (two terms) or Ask

New to Pennington

Dashboard → Query 5, 10

ALL 20 PRE-BUILT QUERIES

#	Query title	Parameters / notes
Research Themes		
1	Top diseases studied	Ask for: How many results (default 15)
2	Top chemicals/compounds	Ask for: How many results (default 15)
3	Top genes studied	Ask for: How many results (default 15)
4	Publication trends by year	No parameters — runs instantly
5	Top research topics	Ask for: How many results (default 15)
Authors		
6	Most prolific authors	Ask for: How many results (default 20)
7	Papers by a specific author	Ask for: Author name (partial OK), how many
8	Top co-authors for a researcher	Ask for: Author name, how many
9	Authors by disease focus	Ask for: Disease name, how many
Collaborations		
10	Top collaborating institutions	Ask for: How many results (default 20)
11	International collaboration countries	Ask for: How many results (default 20)
Entity Co-occurrence		
12	Papers mentioning two entities together	Ask for: Entity 1 name, Entity 2 name, how many
13	Most common disease-gene pairs	Ask for: How many results (default 15)
14	Overall corpus summary	Shows: No parameters — runs instantly
Corpus Statistics		
15	Most cited papers	Ask for: How many results (default 10)
16	Top journals publishing Pennington research	Ask for: How many results (default 15)
17	Publication count by work type	No parameters — runs instantly
18	Top funding sources	Ask for: How many results (default 15)
Disease-Specific		
19	Research on a specific disease over time	Ask for: Disease name
20	Chemicals co-occurring with disease	Ask for: Disease name, how many

TIPS

Name searches are partial and case-insensitive — type 'ravussin' to find 'Éric Ravussin'

Disease/entity searches are also partial — 'diabet' matches 'diabetes', 'diabetic', 'pre-diabetes'

Switch between Chart and Table tabs to change the view of your results

Click Download CSV in the Table tab to export any result to Excel

Increase the results slider before running to see more than the default
